Release Notes

Hosted Payments/MMC Updates

Resolved Issues & Improvements

We addressed the following issues and enhanced existing functionality in the current release to ensure your experience is top notch!

1. Error Message Displayed for 3-D Secure Authentication Failure

Clarification was added to a 3-D Secure authentication failure. Now, an error message stating, "Cardholder authentication failed. Unable to process as 3DSecure transaction." will display.

TFS ID	Description
147566	HP: Display platform generated error message for 3DS Authentication failure

2. Block on eService Processing for Maestro Cards Removed

Hosted Payments now allows Maestro 3DS transactions for eService processing.

TFS ID	Description
153758	Hosted Payments remove block on Maestro cards

3. Wording Clarification for Token Functionality

For clarity, when setting up a token with the "Token" method, the wording of the message displayed was updated to, "Your card is about to be tokenized."

TFS ID	Description
155799	Hosted Payments "token" function displays text about checking your order for accuracy.

4. Resolved Issue with Production Vendor ID Not Being Sent

An issue where the vendor ID for a swiped transaction was not being sent in production was resolved.

TFS ID	Description
156228	HP - production vendor id for swiped transaction is not being sent

5. Support Added for MasterCard 2 Series BIN

Updates were made in order to be compliant with the MasterCard Scheme mandate that all payment applications must be able to support the MasterCard 2 BIN series cards.

TFS ID	Description
157746	Hosted Payments Support for MasterCard 2 Series BIN
