

Release Notes

CWS Updates

Enhancements & New Features

The .30R1 release includes many new capabilities for the EVO Snap* platform, as well as multiple smaller enhancements:

1. Updated CreateUser Request

Front-End/Market: All markets

The CreateUser request was updated to add a parameter to have the platform send the temporary password or send the temporary password back on the response of the CreateUser call.

TFS ID	Description
149374	Update Create User Request on Admin Endpoint

2. Deprecation of Level3Added

Front-End/Market: All markets

The decision was made to deprecate the Level3Added DSP response field as none of the Snap* supported DSPs support this field.

TFS ID	Description
152279	Deprecate Level3Added on Capture Response, AuthAndCap Response and Authorize Response

Resolved Issues

We addressed the following issues in the current release to ensure your experience is top notch!

TFS ID	Description
141937	DC: Whitespace On Platform Response JSON Keys
141993	DC Change: StoredValueBalanceTransferTenderData SourceCardData is missing the Encrypted Data fields
142000	Auto-Reversals now supported on transaction timeouts for eService DSP

150924	DC: Need to add IndustryType to Authorize Request
152422	CTA: New Factor4 SVA service not working
153728	Remove PTLS Schema Rule for PartialApprovalCapability
154744	WSDL Wrangler: Transaction.TransactionData.TransactionDateTime needs to be nillable=true
156238	BI Only Reflecting *Some* VOID Transaction Amounts – Not reflecting other transaction statuses
158689	Remove the persistence rules on PTLS on the EcommerceSecurityData values
159173	Copy/paste error for caching application data in TPS
160954	Fixed bug in some voids of eService 3-D Secure transactions
