

Release Notes

Hosted Payments/MMC Updates

Resolved Issues & Improvements

We addressed the following issues and enhanced existing functionality in the current release to ensure your experience is top notch!

1. Resolved Issue Initiating American Express SafeKey® Transactions

An issue where American Express SafeKey transactions were not being initiated, even when the merchant supported SafeKey, has been resolved.

TFS ID	Description
168624	PROD: HP AmEx Safekey transactions are not being initiated when merchant supports Safekey

2. ACH Transactions Being Declined With Invalid Data Combo Message

Issuing an ACH transaction with a personal checking account and “WEB” SEC code was resulting in the affirmative system declining the message with the error message, “Invalid Account Type. Business Checking cannot be used for SEC Code WEB”. This issue has been resolved.

TFS ID	Description
168436	PROD: HP ACH transactions being declined with invalid data combo message
