

Release Notes

NGTrans Feature Enhancements

Enhancements & New Features

1. Support Added for Card on File Data

Updates were made to support recording tokenized CardOnFile transaction data in order to abide by new compliance regulations. These updates support Credit transactions only, and CardOnFile data will be stored for the following transaction types:

- * Authorize
- * AuthorizeAndCapture
- * ReturnUnlinked
- * QueryAccount
- * Verify

TFS ID	Description
141792	Updates to Support CardOnFile

Resolved Issues

We addressed the following issues in the current release to ensure your experience is top notch!

1. PIN Block Length Issue Resolved

Encrypted PIN data on certain transactions was being created with less than 30 bytes and was being sent to the NGTrans front-end incorrectly.

TFS ID	Description
162017	Cert: PIN Block being sent to NGTrans only needs to be 30 bytes in length
