

Release Notes

CWS Updates

Enhancements & New Features

The .31R1 release include many new capabilities for the EVO Snap* platform, as well as multiple smaller enhancements:

1. Recurring Payment Support

Front-End/Market: United States (NGTrans) and Europe (eService)

Updates were made to support recurring bill payment transactions. A recurring transaction is a transaction for which a cardholder provides written permission to a merchant to periodically charge their account number for recurring goods or services, such as subscriptions, membership fees, tuition, or utility charges. Recurring bill payments are supported for the NGTrans and eService DSPs and in the MOTO and Ecommerce industry types.

TFS ID	Description
158844	RecurringDetails Data Storage
158846	Query and Renew RecurringDetails Operations

2. Iberia Support

Front-End/Market: Europe (eService)

Updates were made in order to support a new ISV partner, Iberia Airlines, which services the Spanish market. Specifically, the transaction's life cycle TransactionIds that are returned from Visa and MasterCard have been added to the Authorization response.

TFS ID	Description
178004	Updates for Iberia Transaction ID for Visa and MasterCard
181201	CWS Updates for Iberia TxnId

3. Disburse Support

Front-End/Market: Europe (eService)

Updates were made to continue supporting the Disburse operation for the eService DSP, including checking to see if the Disburse transaction type is supported before allowing the transaction to process.

TFS ID	Description
164318	Add Disburs as supported operation
182298	Update TPS for checking if Disburs is a supported operation for the adapter
164319	EL Updates to add Disburs as supported operation
