

Release Notes

NGTrans Updates

Enhancements & New Features

1. Implement Recurring Bill Payments

Updates were made to implement recurring bill payment transactions for NGTrans. A recurring transaction is a transaction for which a cardholder provides written permission to a merchant to periodically charge their account number for recurring goods or services, such as subscriptions, membership fees, tuition, or utility charges.

TFS ID	Description
162104	NGT Implement Recurring Payments

2. LaneID Support

Updates have been made to support the addition of the LaneID field for CaptureAll transaction types. Adding Lane ID to the transaction request will allow support of the centralized TID feature on Retail and Restaurant terminals. In this workflow, transactions can be processed on multiple lanes on a single MID and TID.
