

## Release Notes

CWS Updates

## Enhancements & New Features

The .32R2 releases includes many new capabilities for the EVO Snap\* platform, as well as multiple smaller enhancements:

### 1. New Contactless Transaction Workflow

Front-End/Market: Europe (eService)

Updates have been made in order to remain compliant with new mandates, which state that processors in Ireland, United Kingdom, and Germany must support an improved workflow for Contactless transactions that have reached a monetary or quantitative limit.

Enhancements in this release include support for online refund auto-reversals, removal of outdated rules for more streamlined functionality, and further updates to support the eService adaptor.

TFS ID	Description
187939	SCA - Autoreversal on Online Refund
190227	SCA - Cless PIN Updates - Mapping through to eService
189695	SCA - Remove PTLs Rule For Contactless PIN Number/Digits/No./# - TPS Updates Only

Please note that these features will not be fully available until the eService adaptor has been deployed.

## Resolved Issues

We addressed the following issues in the current release to ensure your experience is top notch!

TFS ID	Description
