

Release Notes

CWS Updates

Enhancements & New Features

The .33R2 release includes many new capabilities for the EVO Snap* platform, as well as multiple smaller enhancements:

1. New EVO Gift Service

Front-End/Market: United States (NGTrans)

The new EVO Gift service supports closed loop gift card processing for US customers. This service supports Managed (host capture) processing. Merchants have the option to use gift card processing with or without credit card payment processing.

Please note that there is no bulk load or block activation features at this time.

EVO Gift Integration Guide for Merchants coming soon!

2. Credit Tip Adjust Updates

Front-End/Market: Mexico (Banamex)

Updates were made to include the StatusCode from the original Authorize and Capture transaction to be used in Banamex Tip Adjust transactions. Please note that this field can be ignored by other front-ends, such as NGTrans, who process Tip Adjust transactions.

TFS ID	Description
195409	Fix Banamex Tip Adjust Status Code

Resolved Issues

We addressed the following issues in the current release to ensure your experience is top notch!

TFS ID	Description
157257	Tip Transaction/Return Workflow Erroring for CommerceDriver
185179	Captured Amount Incorrect After Partial Refund With a Tip
181756	Remove PaymentAttribute for VOID on Secure3dInd
