CWS Updates

Enhancements & New Features

The .35R4 release was focused on enhancing support for 3-D Secure 2.0 in Europe:

Card on File for Payment Transactions

There are multiple options for managing a card on file while processing a payment, depending on which 3-D Secure 2.0 workflow is used. Please see the relevant workflow page on the [Snap* Documentation Portal](#) for more information on managing a card on file without payment processing.
