Resolved Issues

We addressed the following issues in the current release to ensure your experience is top notch!

No longer automatically processing failed 3DS authentication transactions as non-3D Secure

The 3D Secure Addin will no longer automatically process failed 3D Secure authentication transactions as non-3D Secure transactions to the front-end. Instead, the 3D Secure Processor will decline the transaction until Merchant-defined 3D Secure Rules (applying to both 1.0 and 2.0 protocols) are in place.

TFS ID	Description
223912	3DS 1.0: Resubmit with no PaRes should throw exception and stop processing
