Release Notes

CWS Updates

Enhancements & New Features

The .35R8 release includes updates to support Anonymous Prepaid cards for 3-D Secure 2.0 and other Platform improvements:

Anonymous Prepaid Transaction Support

Anonymous Prepaid transactions are defined as transactions where the card is not tied to a bank account or an individual, but rather to a sum of money, which can originate from cash. For these transactions, the Cardholder is unknown to the Issuer. To continue supporting 3-D Secure 2.0, updates were made to the Snap* Platform to support Anonymous Prepaid transactions for MasterCard and Visa.
